Grant Improves Water System in Village of Cecil

COLUMBUS – Paulding County will receive a grant to improve the water system in the village of Cecil. The grant is from the Community Development Block Grant, Residential Public Infrastructure Program.

The County will receive a $402,000 grant to replace the village wastewater treatment plant and install one lift station, as well as $402,000 from other funding sources that will go towards the project costs. The project will benefit 85 households.

“Efficient and safe water systems are integral to providing a strong quality of life for Ohioans,” said David Goodman, director of the Ohio Development Services Agency. “Reliable and upgraded infrastructure also better positions our communities for economic development.”

The Community Development Block Grant Program is administered by the Ohio Development Services Agency’s Office of Community Development.
