1999 Estimates Geographic Base

The 1999 round of population estimates are based on geographic updates applied by a new processing system known as GUSSIE (Geographic Update System to Support Intercensal Estimates). GUSSIE generates estimated 1990 base housing unit and population numbers (updated to reflect changes in political boundaries) via two automated methods. Both of these methods are consistent with geographic updates applied to the Census Bureau's TIGER(r) (Topologically Integrated Geographic Encoding and Referencing) System.

The primary method of updating the 1990 base numbers is by address geocoding. This method is used in areas that have standard street name and house number addressing systems. Using the current geographic information in TIGER(r)(based on the 1998 boundary and annexation survey), GUSSIE applies current geocodes to all 1990 housing units with addresses that correspond to address ranges in TIGER(r). Those housing units whose addresses do not correspond to an address range are geocoded by the second method.

The second method used mainly in the more rural areas, or areas that do not have standard street name and house number addressing systems, is called block proportioning. The block proportioning method assigns a ratio to each census block, corresponding to the proportion of the block's street features that lie within a given jurisdiction. For example, if a particular block is partially in city "A" and partially in city "B", the block proportioning method determines how much of the block is in each city and computes an appropriate ratio. In a given census block, any housing units that are not assigned geographic codes by the address geocoding method described above, will be assigned based on the proportion computed for that block. Changes to county-level housing unit numbers by address geocoding were not allowed, but a limited number of county changes resulted from the block proportioning method.

For the 1999 round of estimates, GUSSIE has captured all annexations, deannexations, mergers, incorporations, and disincorporations that were reported in the 1998 boundary and annexation survey, as of January 1, 1998.

If you have any questions or concerns regarding the new GUSSIE system, feel free to contact the population distribution branch at (301) 457-2419, or e-mail Rodger Johnson at <rodger.v.johnson@ccmail.census.gov >.

Note: The 1999 round of population estimates and Census counts are based on geographic updates applied by a new processing system known as GUSSIE (Geographic update System to Support Intercensal Estimates) which was made by the U.S. Census Bureau. GUSSIE has captured all annexations, deannexations, mergers, and disincorporations that were reported in the 1998 Boundary and Annexation Survey, as of January 1, 1998. For more information, please call (614) 466-2116.

Note: The 1999 round of population estimates and Census counts are based on geographic updates applied by a new processing system known as GUSSIE (Geographic update System to Support Intercensal Estimates) which was made by the U.S. Census Bureau. GUSSIE has captured all annexations, deannexations, mergers, and disincorporations that were reported in the 1998 Boundary and Annexation Survey, as of January 1, 1998.
