OHIO MADE PRODUCTS

July, 2019

The question is often asked, “What products are made in the State of Ohio?” By and large, the largest numbers of things made in Ohio are parts and components that go into another product. For example, Dana Corporation with headquarters in Toledo, produces hundreds of plastic and metal parts that go into the assembly of motor vehicles by General Motors, Ford and Chrysler.

In addition to Ohio’s integral role in parts manufacturing, there are a number of products both consumer and industrial that Ohio based manufacturers make. The following lists are a sampling of those products.

Over 330 are identified and many more are possible. **To be listed, the product had to be assembled in Ohio and have a multi-state or national / international market focus.** While there are hundreds of food and beverage products, the list tried to focus on products that have national name recognition.

Lists are organized by county of manufacture and company name.

If you know of additional products, please feel free to contact the office with the information so that it can be added to future updates.

Production: Steve Kelley, Editor.
