TOTAL TRANSFER PAYMENTS

Content

The data in this table are aggregate transfer payments (in thousands of dollars). No adjustment for inflation has been made. The latest year for total personal income is included for the calculation of a dependency ratio—*i.e.*, total transfer payments as a percentage of total personal income in 2000. The counties are ranked by their dependency on transfer payments, with one indicating the greatest dependence.

A transfer payment is a payment to a person, usually in monetary form, for which that person has not rendered a service. Examples include unemployment benefits, social security and other retirement benefits, and the value of food stamps, among other things.
