A large, stylized map of the state of Ohio is formed by a grid of small, light gray circles. The circles are arranged in a pattern that follows the outline of the state, with some circles missing to create a dotted effect. The text is overlaid on this map.

2006 Annual Loan & Grant Report

January 1 through December 1, 2006

Department of Development

Ted Strickland, Governor
Lee Fisher, Lt. Governor
Director, Ohio Department of Development

June 1, 2007

Dear Ohio General Assembly:

I am pleased to present you with the Ohio Department of Development's 2006 Annual Loan and Grant Report, which provides a summary listing of activities related to the financial assistance programs managed by the Ohio Department of Development (ODOD) for calendar year 2006 (January 1 through December 31, 2006). In keeping with the State's commitment to financial accountability and transparency in the use of public funds, this report outlines by county the projects or entities that received approval for assistance through these program during the calendar year.

The State's assistance is divided into three categories:

Direct Assistance to Business, which includes direct ODOD financial assistance for business attraction and expansion projects entailing job creation, job retention, and workforce training.

Indirect Economic Assistance, which encompasses funding programs that improve a business or local entity's competitiveness but are not measurable in terms of immediate employment increases. These programs, some of them federal pass-through, generate long-term economic benefits for the state, but should not be subject to short-term quantitative criteria.

Community Assistance, which identifies financial assistance targeted at quality-of-life enhancements at the local level. The majority of these programs are federally funded, with administrative responsibilities assigned to the ODOD.

The reported job creation and retention numbers represent **projections** which the respective companies have committed to generating in order to receive state assistance. Companies are typically afforded three years in which to fulfill their commitments. Economic conditions occasionally precipitate adjustments in the projected figures.

Financial commitments listed provide a total of \$623,235,118 through 58 programs. The numbers are impressive and a number of Ohio Department of Development employees, from the regional offices to the loan officers in Columbus, review and evaluate every aspect of these business and community projects. Their commitment to quality and improved economic opportunities is your assurance that the state's resources are wisely invested.

I greatly appreciate the support given by the Ohio General Assembly over the past years and for your work to grow our state's economy. As a former member of the Ohio General Assembly, I understand the importance of sharing this data with you. This report provides detail of how the State of Ohio assists the business and communities in your districts and we welcome your input. If you have any questions or comments concerning this report, please contact Ed Jerse, Director for Legislative Affairs, at (614) 644-8630.

Sincerely,

Lee Fisher
Lt. Governor
