

**METROPOLITAN STATISTICAL AREAS
METROPOLITAN DIVISIONS
MICROPOLITAN STATISTICAL AREAS
COMBINED STATISTICAL AREAS
NEW ENGLAND CITY AND TOWN AREAS
COMBINED NEW ENGLAND CITY AND TOWN AREAS**

As of December 2003

Lists 1 through 9

**Metropolitan Statistical Areas, Metropolitan Divisions, Micropolitan Statistical Areas,
Combined Statistical Areas, New England City and Town Areas, and
Combined New England City and Town Areas – December 2003**

1. Brief Overview of the Classification

The Office of Management and Budget (OMB) published the Standards for Defining Metropolitan and Micropolitan Statistical Areas in a *Federal Register* Notice (65 FR 82228 – 82238) on December 27, 2000. (The standards are available at <http://www.whitehouse.gov/omb/fedreg/metroareas122700.pdf>.) That Notice also provides information on the multi-year public review process that preceded the adoption of the standards, and an explanation of the key terms used in the standards. The 2000 standards replace and supersede the 1990 standards for defining Metropolitan Areas. OMB's 2000 standards proved for the identification of the following statistical areas in the United States and Puerto Rico:

- Metropolitan Statistical Areas (including Metropolitan Divisions, where applicable)
- Micropolitan Statistical Areas
- Combined Statistical Areas
- New England City and Town Areas (including New England City and Town Area Divisions, where applicable)
- Combined New England City and Town Areas

Metropolitan Statistical Areas have at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. Micropolitan Statistical Areas – a new set of statistical areas – have at least one urban cluster of at least 10,000 but less than 50,000 population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties. Metropolitan and Micropolitan Statistical Areas are defined in terms of whole counties (or equivalent entities), including in the six New England States. If the specified criteria are met, a Metropolitan Statistical Area containing a single core with a population of 2.5 million or more may be subdivided to form smaller groupings of counties referred to as Metropolitan Divisions.

The classification includes about 93 percent of the U.S. population – about 83 percent in metropolitan statistical areas and about 10 percent in micropolitan statistical areas. (Previously, the classification included about 80 percent of the U.S. population.) Of 3,141 counties in the United States, 1,090 will be in the 361 metropolitan statistical areas in the United States and 690 counties will be in the micropolitan statistical areas (1,361 counties will remain outside the classification). (Previously, the classification included 847 metropolitan counties.)

In view of the importance of cities and towns in New England, the 2000 standards also provide for a set of geographic areas that are defined using cities and towns in the six New England states. The New England City and Town Areas (NECTAs) are defined using the same criteria as Metropolitan and Micropolitan Statistical Areas and are identified as either metropolitan or micropolitan, based, respectively, on the presence of either an urbanized area of 50,000 or more population or an urban cluster of at least 10,000 but less than 50,000 population. If the specified criteria are met, a New England City and Town Area containing a single core with a population of at least 2.5 million may be subdivided to form smaller groupings of cities and towns referred to as New England city and Town Area Divisions.

If specified criteria are met, adjacent Metropolitan and Micropolitan Statistical Areas, in various combinations, may become the components of a new set of complementary areas called Combined Statistical Areas. For instance, a Combined Statistical Area may comprise two or more Metropolitan Statistical Areas, a Metropolitan Statistical Area and a Micropolitan Statistical Area, two or more Micropolitan Statistical Areas, or multiple Metropolitan and Micropolitan Statistical Areas that have social and economic ties as measured by commuting, but at lower levels than are found among counties within Metropolitan and Micropolitan Statistical Areas. The geographic components of combined New England City and Town Areas are individual metropolitan and micropolitan NECTAs, in various combinations. The areas that combine retain their own designations as Metropolitan or Micropolitan Statistical Areas (or NECTAs) within the larger Combined Statistical Area (or Combined NETCA). Combinations for adjacent areas with an employment interchange of 25 or more are automatic. Combinations for adjacent areas with an employment interchange of at least 15 but less

than 25 are based on local opinion as expressed through the Congressional delegations. Combined Statistical Areas can be characterized as representing larger regions that reflect broader social and economic interactions, such as wholesaling, commodity distribution, and weekend recreation activities, and are likely to be of considerable interest to regional authorities and the private sector.

OMB's standards provide for the identification of one or more principal cities within each Metropolitan Statistical Area, Micropolitan Statistical Area, and NECTA. (The term "principal city" replaces "central city," the term used in previous standards.) Principal cities encompass both incorporated places and census-designated places (CDPs). The decision to identify CDPs as principal cities represents a break with practice in previous standards that (with some exceptions) limited potential central city identification to incorporated places. In addition to identifying the more significant places in each Metropolitan and Micropolitan Statistical Area or NECTA in terms of population and employment, principal cities also are used in titling Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, Combined Statistical Areas, NETCAs, NECTA Divisions, and Combined NECTAs.

The geographic components of Metropolitan and Micropolitan Statistical Areas and Metropolitan Divisions are counties and equivalent entities (boroughs and census areas in Alaska, parishes in Louisiana, municipios in Puerto Rico, and independent cities in Maryland, Missouri, Nevada, and Virginia). The counties and equivalent entities used in the definitions of the Metropolitan and Micropolitan Statistical Areas are those that were in existence as of January 1, 2002.

The 2000 standards do not provide for the categorization of the areas based on total population comparable to Levels A – D under the 1990 standards.

This appendix includes the following nine lists that provide information on the statistical areas that are recognized under the 2000 standards using data from Census 2000 and Census Bureau population estimates for 2001 and 2002.

- List 1 is an alphabetical list by title of 947 Metropolitan Statistical Areas and Micropolitan Statistical Areas
- List 2 provides titles, definitions, principal cities, and Metropolitan Divisions for 369 Metropolitan Statistical Areas (361 in the United States and 8 in Puerto Rico).
- List 3 provides titles, codes, and definitions for 29 Metropolitan Divisions within their respective Metropolitan Statistical Areas.
- List 4 presents the titles, definitions, and principal cities for 578 Micropolitan Statistical Areas (573 in the United States and 5 in Puerto Rico). **There are 13 new Micropolitan Statistical Areas that are identified in that list.**
- List 5 identifies 123 Combined Statistical Areas and their 333 component Metropolitan and/or Micropolitan Statistical Areas. **The 9 new Combined Statistical Areas and 3 new components of existing Combined Statistical Areas are identified in the list.**
- List 6 identifies in each state the Metropolitan Statistical Areas, Metropolitan Divisions, Micropolitan Statistical Areas, and Combined Statistical Areas.
- List 7 provides titles, definitions, principal cities, and New England city and Town Area Divisions for 43 New England City and Town Areas. The new Claremont, NH New England City and Town Area are defined in the list.
- List 8 provides titles and definitions for 10 combined New England City and Town Areas and their 27-component New England City and town Areas. The one new Combined New England City and Town Area (Claremont-Lebanon, NH-VT) is identified in the list.
- List 9 identifies in each state the New England City and Town Areas, the New England City and Town Area Divisions, and the Combined New England City and Town Areas.

2. Guidance on Presenting Data for Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, Combined Statistical Areas, NECTAs, NECTA Divisions, and Combined NECTAs.

Metropolitan and Micropolitan Statistical Areas represent the basic set of county based areas defined under this classification. If specified criteria are met, Metropolitan Divisions are defined within Metropolitan Statistical Areas that have a single core with a population of at least 2.5 million. Not all Metropolitan Statistical Areas with urbanized areas of this size will contain Metropolitan Divisions. The criteria used to determine what counties are included in a Metropolitan Statistical Area are different from the criteria that are used to group counties in Metropolitan Divisions, which represent the subdivisions of (larger) Metropolitan Statistical Areas. As a result, it is generally not appropriate to rank or directly compare Metropolitan Divisions (or NECTA Divisions) with Metropolitan and Micropolitan Statistical Areas (or Metropolitan and Micropolitan NECTAs). However, because of the large population concentrations represented by Metropolitan Divisions, it may be desirable for some analyses, for example, to include Metropolitan Divisions in a table in which Metropolitan Statistical Areas are ranked. It would, of course, be appropriate to rank and compare Metropolitan Divisions. Even though Metropolitan Divisions represent subdivisions of (larger) Metropolitan Statistical Areas, they often function as distinct areas within Metropolitan Statistical Areas. Researchers analyzing demographic and economic patterns, trends and processes within large Metropolitan Statistical Areas should also take into consideration data for specific Metropolitan Divisions. Research and analyses that previously made use of data for Primary Metropolitan Statistical Areas should now use data for Metropolitan Divisions.

Because Combined Statistical Areas represent groupings of Metropolitan and Micropolitan Statistical Areas (in any combination), they should not be ranked or compared with individual Metropolitan and Micropolitan Statistical Areas.

Because Combined New England City and Town Areas (NECTAs) represent groupings of Metropolitan and Micropolitan NECTAs (in any combination), they should not be ranked or compared with individual Metropolitan and Micropolitan NECTAs.

3. Codes for Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, Combined Statistical Areas, New England City and Town Areas (NECTAs), NECTA Divisions, and Combined NECTAs.

Codes for Metropolitan and Micropolitan Statistical Areas, Metropolitan Divisions, NECTAs, and NECTA Divisions will be 5 digits in length. This replaces the 4-digit code previously used. Codes for Metropolitan and Micropolitan Statistical Areas and Metropolitan Divisions fall within the 10000 to 49999 range and are assigned in alphabetical order by area title. Metropolitan Divisions are distinguished by a 5-digit code ending in “4”. NECTA and NECTA Division codes fall within 70000 to 79999 range and are assigned in alphabetical order by area title. NECTA Divisions will be distinguished by a 5-digit code ending in “4”.

Combined Statistical Area and Combined NECTA codes will be 3 digits in length. Combined Statistical Area codes will fall within the 100 to 599 range. Combined NECTA codes will fall within the 700 to 799 range.

LIST 2 - Ohio

METROPOLITAN STATISTICAL AREAS

This list provides titles and codes, principal cities, Metropolitan Division Titles, and codes (where applicable), and definitions in counties and equivalent entities for all 369 Metropolitan Statistical Areas in the United States and Puerto Rico. The 49 new Metropolitan Statistical Areas, as of June 6, 2003, are identified in the list. There are 11 Metropolitan Statistical Areas that have a total of 29 Metropolitan Divisions.

- 10420 Akron, OH Metropolitan Statistical Area
Principal City: Akron
Portage County, Summit County

- 15940 Canton-Massillon, OH Metropolitan Statistical Area
Principal Cities: Canton, Massillon
Carroll County, Stark County

- 17140 Cincinnati-Middletown, OH-KY-IN Metropolitan Statistical Area
Principal Cities: Cincinnati, OH; Middletown, OH
Dearborn County, IN; Franklin County, IN; Ohio County, IN; Boone County, KY; Bracken County, KY; Campbell County, KY; Gallatin County, KY; Grant County, KY; Kenton County, KY; Pendleton County, KY; Brown County, OH; Butler County, OH; Clermont County, OH; Hamilton County, OH; Warren County, OH

- 17460 Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area
Principal Cities: Cleveland, Elyria, Mentor
Cuyahoga County, Geauga County, Lake County, Lorain County,
Medina County

- 18140 Columbus, OH Metropolitan Statistical Area
Principal City: Columbus
Delaware County, Fairfield County, Franklin County, Licking County,
Madison County, Morrow County, Pickaway County, Union County

- 19380 Dayton, OH Metropolitan Statistical Area
Principal City: Dayton
Green County, Miami County, Montgomery County, Preble County

- 30620 Lima, OH Metropolitan Statistical Area
Principal City: Lima
Allen County

- 31900 Mansfield, OH Metropolitan Statistical Area
Principal City: Mansfield
Richland County

- 37620 Parkersburg-Marietta, WV-OH Metropolitan Statistical Area
Principal Cities: Parkersburg, WV; Marietta, OH
Washington County, OH; Pleasants County, WV; Wirt County, WV;
Wood County, WV

- 41780 Sandusky, OH Metropolitan Statistical Area
Principal City: Sandusky
Erie County

- 44220 Springfield, OH Metropolitan Statistical Area
Principal City: Springfield
Clark County

LIST 2 - Ohio

METROPOLITAN STATISTICAL AREAS

- 45780 Toledo, OH Metropolitan Statistical Area
Principal City: Toledo
Fulton County, Lucas County, Ottawa County, Wood County
- 48260 Weirton-Steubenville, WV-OH Metropolitan Statistical Area
Principal Cities: Weirton, WV; Steubenville, OH
Jefferson County, OH; Brooke County, WV; Hancock County, WV
- 49660 Youngstown-Warren-Boardman, OH-PA Metropolitan Statistical Area
Principal Cities: Youngstown, OH; Warren, OH; Boardman, OH
Mahoning County, OH; Trumbull County, OH; Mercer County, PA
